

CompuTicket

Ticketing POS System and Access Control

Self Service Ticket Solutions for
Amenity Areas, Sports and Wellness Centres

Ticketing POS system with new possibilities

With our wide range of modules we embrace all conceivable facilities in small and large sports centres. A CompuSoft solution will make it easy for your visitors to buy tickets – and at the same time provide significant benefits to your amenity area.

An all-in-one solution covering all aspects of your amenity area

With a wide range of add-on modules you get an overall system that manages your entire centre, all modules being scalable for your project and with new possibilities for increasing revenue.

Combine web shop ticketing and self service

Benefit from multiple ticketing methods: Online web shop, on-site ticketing POS, self service ticketing kiosks, guest wallet app, and online payment site for all types of payments.

A variety of options meet your requirements

Access control system, pedestal and counter turnstiles, flap gates, +accessibility turnstiles, electronic key systems for doors, changing rooms and cabinets, and PDA handhelds for mobile access control.

Key benefits

- Reduce queue
- Minimize cash handling
- Increase on-site revenue

A WIDE RANGE OF ADD-ON MODULES, ALL SCALABLE FOR YOUR PROJECT.

COMPUISOFT

Klip: 1 Person

One Solution - One ticket - All Advantages

Would you like to sell more tickets?
Get a self service ticketing system providing easy purchase of tickets with instant access. Benefit from reduced queues and overall control of events, sports, and inhouse visitors.

Easy management of members & teams.
Booking of teams, lanes, and activities.

E-Ticket, Disposable Wristbands, RFID
Wristbands, Pincodes, and more.

CompuTicket - fast, convenient and secure

Visitors can buy tickets with greater comfort over the internet without having to wait in line. Greater convenience with ticket sales, either online, through registered points of sale, or through self service kiosks, with instant access to your centre or event after purchase. Reduces waiting time and the size of the queues.

When buying tickets online, your visitors receive a QR-ticket via e-mail and SMS, which can be for instant access, or it can be converted at the self service kiosk into an access media like disposable wristbands or chip wristbands.

E-ticketing opens up new possibilities in your amenity area

Combining the ticketing system with our access control system provides instant access to sports, events, and facilities. The advanced solution provides heightened guest experience of extreme convenience and improved utilisation of the opportunities in your amenity area.

Digital wallet increases revenue

Instant purchase whenever you want. Offer even more experiences and services like snacks and beverages from the café. We provide online payment solution to suit any purchase.

How to know what your visitors like best

The system's real-time data reporting and actionable insight of visitors' behaviour provides detailed statistics showing which facilities are profitable and where to expand.

The Smart Sports Center is here already

Live count automates opening/closing for ticket sales to specific zones depending on a preset allowed capacity. Intelligent control of locking, heating, water, and electricity for safe and secure facilities.

Tickets come in various shapes

E-tickets, RFID tickets, pin codes, QR and bar codes. Reusable and one-time-use. All can be assigned with individual access rights.

Access Medias:

- ✓ RFID wristbands
- ✓ RFID keys
- ✓ Barcode
- ✓ E-ticketing
- ✓ QR codes
- ✓ Pin codes
- ✓ Disposable wristbands
- ✓ Smart Cards

Digital ticketing kiosks with instant access to the event

Buy tickets with greater comfort from CompuSoft self service ticketing kiosk, without having to wait in line. All kinds of tickets are issued directly from the kiosk or at vending machines with instant access to the event.

Facilitate and increase external access to ticket sales, registration and services.

Fast ticket sales with instant access to event after purchase.

Self Service Kiosks increase external access to ticket sales

This efficient payment solution can be made available at various locations with large visitor flow, in order to facilitate and increase external access to ticket sales, registration, services and consultation.

Variety of options to suit any type of ticket sales

Different equipment meets specific access needs: Receipt printer, ticket printer, barcode reader, RFID reader, NFC technology, payment terminal, cash payment, issue of e-tickets, RFID tickets, disposable wristbands.

Credit cards

Cash

Step 1: Buy your tickets at the kiosk or at the web site

Benefit from reduced waiting time and less queues. Combine with online ticketing shop for even greater comfort. Each self service ticketing kiosk is being configured to your project and meets every challenge.

Accepts all types of payment

The kiosk can be configured to take all types of payment: Cash payment, coins and notes, common payment cards, and NFC. You decide which types of payment must be available for your visitors.

Dispense all types of tickets

- RFID wristbands
- RFID cards
- QR codes for e-ticketing
- Bar codes for e-ticketing
- Cards/paper
- One-time-use wristbands
- Reusable wristbands
- Pin codes

Strong and durable indoor and outdoor models

Stylish design that fits into all modern environments. Strong and durable to withstand high-traffic areas as well as outdoor areas.

Scan chip →

Step 2: Collect your tickets at the ticket dispenser machine

Collect your ticket and get instant access to all facilities. Choose from e-ticketing, RFID ticketing, pin codes, QR codes, or bar codes. You can even introduce all ticket types and use them in mixed solutions.

Experience the benefits of introducing more ticket types

We provide all types of ticketing and your sports centre will benefit from having all possibilities available. We guarantee you a ticketing solution that adapts to your facility and grows with your ideas.

Wide range of high quality ticket readers for all purposes

- RFID readers
- RFID readers with LED display
- QR readers
- Bar code readers
- Pin code key pads

Ticket dispenser machine for RFID wristbands

User-friendly and stable dispenser for self-service ticket solutions with automatic ticket delivery. Large capacity. Easy filling.

Validation

Auto Check-Out

Live counter

Step 3: Return reusable tickets at the ticket return machine

This efficient ticket return machine ensures that each visitor is handing over his ticket before departure.

In fact, it is very simple: The access control system simply does not open the turnstile before the chip wristband ticket is handed over.

Live count and validation

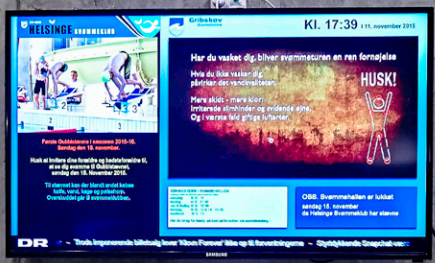

The ticket return machine validates RFID wristband tickets and provides real-time data reports on the number of inhouse visitors.

Automatic opening of turnstiles for check-out

After validation and live count, the access control system checks-out the visitor and opens turnstiles.

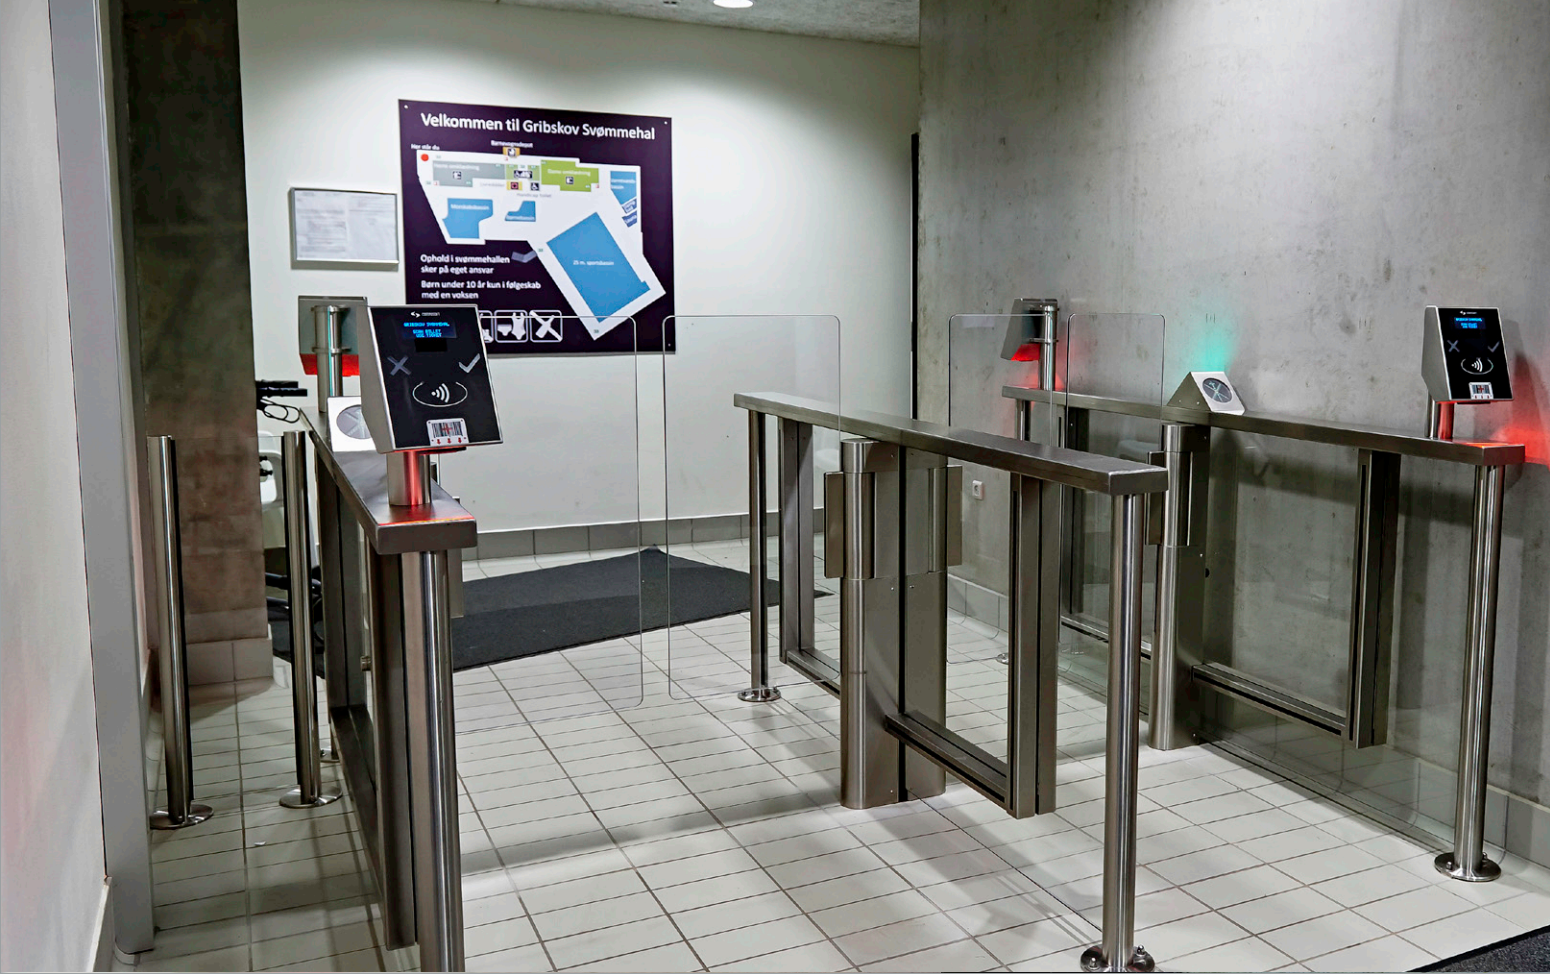

The machine shows 'my account'

When checking-out, the machine shows the visitor's account status: How many visits left on voucher and how much money left on e-wallet.

3

Ticket sales with greater comfort over the internet or at self service kiosks. QR-code or barcode is issued through e-mail to visitor's smartphone, with direct access to the event. Speedgates with multiple readers for QR-codes, barcodes and RFID. Multiple readers for access to changing room.

One ticket that does it all

Great value for your visitors with combined tickets for unlimited access, identification and digital wallet.

Great benefits for your staff with combined facilities for easy management and control of each connected facility in your sports and wellness centre.

RFID identification and digital wallet increase on-site event revenue.

Smart house control: Remote lights, heating, ventilation, water, and locking.

Combined facilities and intelligent readers

Connect all facilities to the access control system and benefit by easy management of sports, wellness and pool areas and all other activities in your amenity centre. Easy set up of prices, opening and closing hours, and access restrictions. Align facilities in groups and adapt configuration to all with one click - or add separate configurations to each facility.

Increase revenue through cashless payment with digital wallets

Understanding your visitors' needs, our cashless payment solution offers the most advanced features to suit any visitor: Purchase of instant access to more activities during your stay. Come on, let's try the Hot Tub now!

Electronic Identification and Locking System

RFID, PIN code, and NFC technology set new standards in safeguarding and organising cabinets, lockers, and safe-deposit boxes. Doors can also be integrated.

Easy fit and retrofit to cabinet doors that are prepared for standard cylinders.

Fits the standard punched hole and must only be fastened by an additional screw.

Keyless - through PIN-code

Just touch the key fields lightly to enter a personal PIN-code.

Touchless - through RFID wristbands or cards

RFID wristbands or cards (digital keys) are simply presented to the reader for identification.

Use a smartphone for locking

Thanks to the new NFC technology, you can use your smartphone as key for your cabinet.

Handheld Devices for Mobile Ticketing and Access Control

Have events in multiple locations? We got you covered. Our rugged PDA with RFID is reliable and efficient for mobile ticketing, transactions and validations. Designed specifically with sports personnel in mind, it's packed with features, including a contactless reader, and is compact and truly portable, and it offers an IP65 ruggedness classification for high humidity environments, making it suitable for your staff to carry along in pool and wellness areas.

Mobile ticketing made easy

The advanced handheld PDA solution merges ultimate mobility with true field functionality.

Contactless payment

The built in smart card reader makes the rugged PDA an extremely fast and accurate tool for contactless payment data collection.

Barcode and QR reader

The device comes with a high-performance 2D imager for scanning and barcoding.

Digital to-do-lists for your staff

PDA TaskManager App for your staff on the go.

Scheduling is the prior step when organising your sport

Just try out our convenient online booking for an easier experience of scheduling your wellness, exercises, activities, and events.

Also available with easy top up of ticket coupons and membership cards.

If your team is full, you are presented for a list of available options.

Convenient online booking and online payment with instant access to event.

Detailed presentation of teams and activities

Scheduling is the prior step when organising your sports. Why not make this as convenient as possible through clear and convenient online booking?

Convenient online booking and online payment

Only a few online clicks and your exercises are scheduled and payed, with instant confirmation through e-mail and SMS.

Customised POS

Customised PDA

On-site ticket sales + sales of snacks and beverages in café

Our efficient POS solution is customised to the smallest detail to suit any busy sales assistant. Benefit from managing multiple work tasks in only one POS system.

Detailed analyses of sales data and easy management of prices and inventory.

Handheld PDA for ticket sales, shops, restaurant, take-away.

Only two keystrokes to complete sale

Standard sales expeditions are quickly completed with only two keystrokes. This ensures season sales assistants within a very short time feel comfortable with the POS.

A comprehensive POS solution

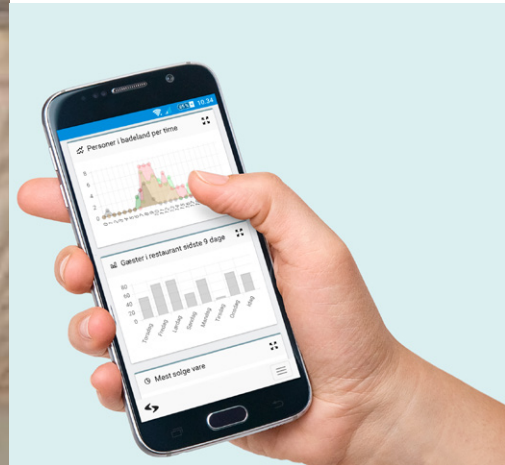

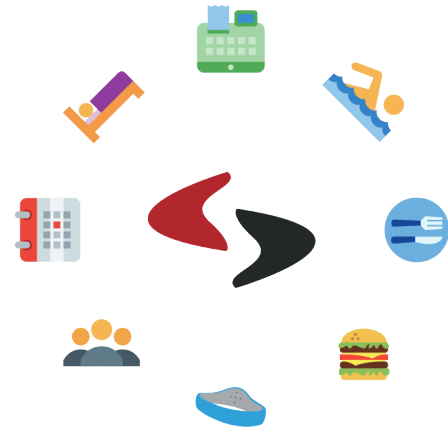

The POS system includes integrations for email marketing, loyalty programs, and lots of other capabilities that make it easier to run and grow your business. You can access the system from any browser, so you can check your sales data and run back-office tasks from wherever you are, and go mobile with our app for handhelds tablets.

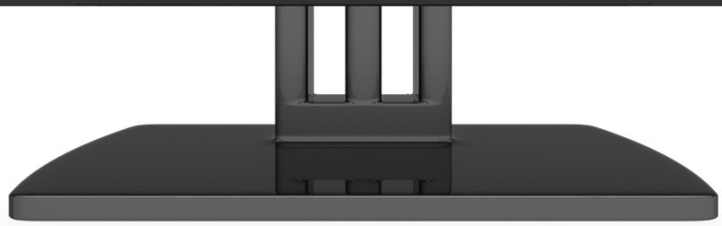

Our POS Solution Wins on Functionality

One combined POS solution offers great comfort for any sales assistant. Optimise staff resources by implementing our time-saving and easy-to-use POS solution.

Comprehensive functionality:

- Customised touch button interface suits any sales tasks.
- Unlimited number of users.
- DashBoard with live insight of cash flow, top selling categories, compared with history.
- Multiple exchange converter.
- On-site ticket sales.
- Shop module for supermarkets.
- Restaurant module with table management.
- Management of kitchen orders.
- Preorders, Take-Away, Happy Hour.
- Inventory control.
- Change calculation.
- Bundling and revenue sharing
- Differentiated price calculation.
- Allocation of discounts and fixed prices.
- Debtor management and invoice handling.
- Issue of gift cards and vouchers.
- And much more...

Gain Control with Live Dashboards

Dashboards offer easily understandable key figures based on live data from your amenity area. CompuSoft Dashboard is an interactive and graphical tool with new possibilities for visualising data.

Live revenue, cash flow, and liquidity compared to other periods.

Number of visitors compared to other periods.

Keep updated from remote

There is so much to keep track of in sports and wellness centres. With CompuSoft Dashboard you benefit from easy overview wherever you are. Go to web dashboards and keep updated from remote.

Dashboard offers detailed info for visitors and management

Set up multiple dashboards and visualise live cash flow and revenue for the management, and present live occupancy rate for visitors for better planning of their stay.

Automatic Parking System with License Plate Recognition

Our parking system with ANPR and integrated access control for self service parking areas.

Automatic license plate recognition (ANPR), e-ticket, RFID and VIP access.

Automatic triggering of events:
Activation of lights, opening doors, etc.

Convenient self service kiosk for
payment, validation, and registration.

Simple and easy check in

While you shortly stop at the barrier, our camera captures your vehicle's license plate and simultaneously you collect your parking ticket. The barrier opens and you can enter the area.

Easy payment and check out

Convenient payment at the payment terminal through credit card or cash. While you drive forward to the check out barrier, the camera captures your license plate again, validates your payment, and the barrier opens for check out. Customised for any parking area.

Support and HelpDesk

Our consultants offer unique knowledge to our products and possess great technological expertise.

We have longterm cooperation with any size of amenity areas, sports and wellness centres.

Our service- and support team is ready to serve you whenever you need assistance.

Online HelpDesk and support plans

A support plan offers access to CompuSoft HelpDesk, which is an online support centre with lots of benefits: Unlimited online access to your cases, questions and answers.

CompuSoft 24/7 support

A support plan offers access to our 24/7 support, and ensures assistance outside our opening hours. For amenity centres with extended requirements, we offer customised support plans focusing on our needs.
